PG-sigmoid identity: MC vs quadrature
exact $\sigma(x)$
MC $N = 10$
MC $N = 100$
MC $N = 500$
GW $n = 3$
GW $n = 5$
GW $n = 10$
GW $n = 15$
NNLS (12 nodes)
$\sigma(x)$
x
Absolute error vs exact $\sigma(x)$
